The screenshot displays the phpMyAdmin web interface in a browser window. The address bar shows the URL: `localhost/phpmyadmin/index.php?route=/database/structure&db=inventory_management`. The interface is for the 'inventory_management' database on a 'localhost' server.

On the left sidebar, the database structure is listed, including tables like 'peanggan', 'pembelian', 'penjualan', 'produk', 'stok_gudang', 'supplier', 'information_schema', 'inventory', 'inventory_db', 'inventory_management', 'mysql', 'performance_schema', 'perpustakaan', 'perpus_dinda', and 'perpustakaan_dinda'.

The main panel shows the 'Structure' tab for the 'inventory_management' database. It lists four tables: 'brands', 'categories', 'orders', and 'products'. Each table has a 'Browse' button and a 'Structure' button. The 'Structure' button is highlighted for the 'products' table.
